

# Practical Action

## Project title

Advocacy for Gender and Energy in Kenya (AGEK)

## Consortium partners

Scode

## Country

Kenya

## Timeframe

2015 – 2017

## Funding

Total project funds: €186,486

ENERGIA contribution: €160,000

## Donors

Dutch Ministry of Foreign Affairs, Directorate General for International Cooperation

## Focus

Gender mainstreaming in SE4All county and country energy planning process

## Target groups

- Regional and national Government agencies and development partners to influence gender content of Kenya's SE4All country agenda, investment prospectus and energy programmes
- County governments to influence gender content of local energy master plans and investments
- General public to raise awareness of gender and energy issues and as a powerful influencer of national and county policy makers.
- CSOs to develop their capacity as gender and energy advocates

## Objective

To lobby and advocate for the adoption of gendered approaches in sub-national, national and international energy plans, strategies and programmes for delivery of universal modern energy access.

## Outcome

Outcome 1	Gender objectives and activities integrated in energy access plans, strategies and programmes.
Results	<ul style="list-style-type: none"><li>• Gender objectives integrated in Kenya's SE4All country Action Agenda and Investment Prospectus</li><li>• Energy access incorporated in County Integrated Development Plans (CIDPs) as a priority service area</li><li>• Gender objectives integrated in CIDP, energy plans and strategies</li></ul>
Output 2	Increased public awareness on the disproportionate negative impacts the lack of appropriate energy has on women and other vulnerable groups - gender and energy nexus.
Results	<ul style="list-style-type: none"><li>• 2 million people reached through a national level campaign on gender and energy.</li><li>• CSOs mobilised, organised and their capacities built as gender and energy advocates</li><li>• National and county level advocacy events conducted to promote adoption of gender-aware approaches in energy planning and delivery.</li></ul>

	<ul style="list-style-type: none"><li>• Key SE4ALL stakeholders made aware and applying gender-informed strategies in their energy programmes</li></ul>
Output 3	Business case for using gender-informed strategies to scale up energy delivery and access presented at SE4ALL national, regional and international forums.
Results	<ul style="list-style-type: none"><li>• Partners actively participate and make substantial contributions at regional and international SE4ALL forums to influence energy stakeholders</li><li>• Communication products on gender and energy developed and used as advocacy tools at national, regional and international SE4ALL forums and featured on Practical Action, ENERGIA, SE4All and other partner websites.</li></ul>
